WHO WE ARE

Wild Code School is a network of schools that train professionals for the most in-demand tech jobs.

Key figures

+20

campuses in Europe
including a remote one

+3

training fields
Web Development, Data &
Cybersecurity

+3000

students trained
since 2014

90%

job placement rate

+1000

partner companies

The 3 pillars of learning at Wild Code School

Innovative, practical teaching approach

Students work in groups on real **client projects** with the support of their instructors to build their first portfolio and prepare for the professional world after the training.

Soft skills training & employability coaching

We support students in the **developing their soft-skills and landing their first tech jobs** after the training. Students hone their profiles and network with tech industry professionals.

European learning community

Over 3 000 tech professionals graduated from Wild Code School since 2013. Students and alumni support each other, discuss latest tech news and share job offers.

TRAINING PROGRAM

Skills you will learn

Our 5-month front-end developer course trains professionals to become web developers. During your training, you will learn multiple skills from **5 main areas** (4 **technical**s and 1 focused on **soft-skills**)

1/ Design a web application

- Conduct a client meeting
- Analyze the needs of a client
- Create a backlog **#SCRUM**
- Plan and track development tasks Design the architecture
- Apply UI/UX best practices
- Create wireframes

2/ Integrate a user interface

- Build a website using **#HTML #CSS**
- Enhance your website with **#VanillaJS**
- Create a **#responsive** interface with **#Bootstrap**
- Build reusable bricks of code

3/ Develop a front-end web application

Development

- Design and develop an application using the **#React** library
- Implement the object-oriented paradigm **#OOP**
- Follow a modern architecture and use a programming language **#JavaScript**
- Use a third-party **#API** in your application
- Build reusable **#React** components

4/ Perfect yourself as a developer

- Organize your technology watch
- Collaborate and contribute to a community of developers
- Learn new technologies
- Understand the basics of back-end programming (intro to **#Node.js**)

5/ Become a tech professional

- Explain development concepts to a non-technical audiences
- Collaborate with and contribute to a community of developers
- Create a professional **#portfolio**
- Develop an online presence as a front-end web developer
- Apply for a front-end web developer position

Collaboration / communication

- Read and contribute to teammate's code with **#Git**
- Explain a technical problem to a non-technical person
- Write a "README" (user guide)
- Realize a project using agile methodology **#SCRUM**

TEACHING APPROACH

Learn key concepts

- **Live courses** taught by a professional instructor to introduce new concepts and review the notions covered in the practical exercises.
- **Live coding** and live demos led by the instructor to showcase development techniques.

Step back and review

- **Individual meetings with your instructor** to customize your learning path and remove obstacles.
- **Client-project demo** to share your progress on your project to the rest of the group.
- **Checkpoints** to evaluate the acquired skills and to identify areas of improvement.

Practice

- **Projects** to practice working with clients using agile methods and to build your professional portfolio.
- **Dojos** to solve algorithmic problems in small groups.
- **Workshops** to practice the notions covered during live courses.
- **Quests** online individual exercises to introduce and practice technical concepts.

Meet professionals

- **Guest speakers** to learn from the experience of tech professionals across Europe.
- **Tech events (hackathons, meetups, workshops...)** to develop your network and to collaborate with the tech community.
- **Job datings and soft-skills coaching** to meet employers and find your first job or internship.

Our 3 values: the core of our teaching approach

PASSION

Intense desire to learn and to share knowledge

INNOVATION

Willingness to create and to improve

HUMANITY

Care for yourself and others

TYPICAL WEEK

9:00 am (UTC+1) - Daily Stand-Up

From the comfort of your home, start your day by connecting to the **daily stand-up**, **our morning ritual** where students share their achievements and challenges of the day with the group. Various teaching activities led by your trainer follow.

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday*
9:00					Dojo
18:00					Project
18:30	Lesson		Lesson		
20:00	Workshop	Homework	Workshop	Homework	
21:30					
Homework (Quests on Odyssey)					

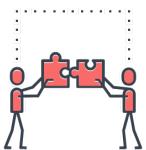

* One Saturday every two weeks

Throughout the 5 months programme you'll acquire technical know-how, and learn to develop **interactive websites using HTML, CSS, Javascript, and take a React development project** to completion. You'll create your portfolio to showcase your work and most importantly, you will learn how to stay ahead of new technologies.

EMPLOYABILITY COACHING

Build your network: Hackathons, client projects, guest speakers. You will have plenty of opportunities during your training to meet tech professionals and show your skills to recruiting companies.

Develop soft-skills: Learn how to learn, work remotely, understand and meet client needs, collaborate with teams. These are the soft-skills that recruiters are looking for and that you will work on intensively during your training.

Personal coaching: the campus manager will organise career coaching workshops to help you improve your CV & LinkedIn profile, build your personal brand, rehearse for a job interview. Individual and in groups, these workshops will support you in seizing the best job opportunities.

They hired our students

OUR REMOTE CAMPUS

A supportive team

Learning from home does not mean learning alone. Each day, you will connect to your remote campus to **learn with your instructor, campus manager and a highly motivated group of ~20 other Wilders.**

Teaching rituals and relevant tools

Attending a training remotely requires organization and determination. This is why **we have structured your learning while still leaving place for flexibility in your working schedule.**

We will also equip you with the **best professional tools** (learning platform, videoconferencing tool and chat) **to help you collaborate efficiently with other colleagues.**

A European network of campuses coming together

During your training, **you are welcome to visit your nearest campus (or any other campus, if you travel)** for events or just to stop by to meet other Wilders.

Benefits of learning remotely

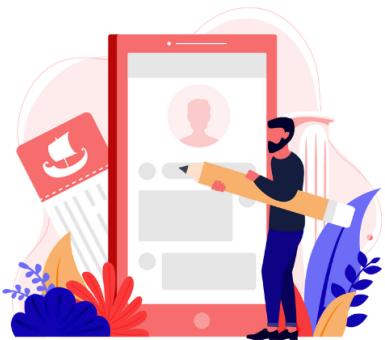

Reduce time spent commuting

Enjoy learning from the comfort of your home

Develop remote working skills

HOW TO JOIN US ?

1

Online Registration

Choose the training course you would like to join and register online

2

Motivational Interview

Friendly conversation with a Campus manager to check your motivation, see if Wild Code School is a good fit for you and answer your questions

3

Tech Interview

Tech challenge presentation and discussion with an Instructor to assess your potential to become a tech specialist

Visit our website to apply:
www.wildcodeschool.com

What prior skills are required?

- **No technical pre-requisites** to join our training courses.
- **No experience requirements:** our students have many different backgrounds: professionals, jobseekers, students, entrepreneurs.
- We are proud to have **students from 18 to 58 years old range!**
Everybody is welcome as long as you are over 18 :)

WILDERS TESTIMONIALS

My training at Wild Code School has been a hell of an amazing journey! The market is changing and people's mindsets change as well. It is not a matter of having diplomas but rather skills, knowledge and experience. And that's what you get here.

Sofia, alumni '19, now Web developer at Decode

I had a great experience at the Wild Code School, I learned a lot and especially, learned to learn, because in the future you will always have to learn new technologies. 1 month before the end of the training, we started to put our CV online, and frankly, I received a lot of calls for internships and jobs.

Yassine, alumni '19, now Front-End Developer at Lijn

UPCOMING SESSIONS & TUITION

Upcoming session dates

From June, 22nd 2020 to October, 14th 2020

5 months / 330 hours

Tuition

- Regular price : 4 500€
- Early bird*: 4 050€

*If the total cost of the training is paid **before the beginning of the session**.

Ask me anything!

If you have questions about the training course, financing options, job placement, etc
